VECTOR ELECTRONICS AND TECHNOLOGY, INC. IS AN ISO 9001:2008 and AS9100C REGISTERED COMPANY

QUALITY POLICY

Vector Electronics & Technology, Inc. will facilitate continuous process improvement and increased customer satisfaction by dedicating ourselves to meeting our customer's requirements by doing it right the first time, every time, and on time. We will achieve and implement our policy by following these basic guidelines.

Our Customer

Our customer is the focus of our business. We are in business because of our customer. We dedicate ourselves to seek out the desires of our customer and will not be satisfied until our customer's requirements are promptly and accurately met. We will meet and comply with all requirements of, and continually improve the effectiveness of the Quality Management System. Quality objectives will be reviewed as needed.

Our Employees

Our employees are our greatest resource. We encourage all employees to develop to their greatest potential through training and continuing education courses. We commit to supplying the encouragement and environment that will help make this possible. This policy will be communicated to all employees at all levels in the company.

Our Suppliers

We desire to develop a partnership with vendors who share our commitment to quality so that a continued relationship will be in the best interests of our customers.

Quality Objectives

- a) Increase over all production efficiency by 10% in the next year.
- b) Increase customer satisfaction by 10% in the next year.
- c) Reduce the number of nonconforming products by 15% in the next year.

VECTOR'S QUALITY MANAGEMENT SYSTEM (QMS) ISO 9001:2008 & AS9100C

What is AS9100C?

The AS9100C standard supplements ISO 9001:2008 by addressing the additional expectations of the aerospace industry by defining additional areas within an aerospace Quality Management System that must be addressed when implementing an ISO 9001:2000-based quality system. AS 9100 has been endorsed by all major Aerospace regulators, including:

- Federal Aviation Administration (FAA)
- U.S. Department of Defense (DoD)
- National Aeronautics and Space Administration (NASA).

AS9100 is a cooperative effort of the International Aerospace Quality Group. Initially released in October 1999 by the Society of Automotive Engineers in the Americas and the European Association of Aerospace Industries in Europe, and shortly thereafter by standards organizations in Japan and Asia, it combines and harmonizes requirements outlined in the SAE's AS9000 and Europe's prEN9000-1 standards. AS9100 is aligned with ISO 9001:2008.

Some of the key areas AS9100 identifies within the aerospace industry are:

- regulatory requirements
- established and documented configuration management process
- planning for in-process verification
- supplier control
- Controlling of production processes

VECTOR ELECTRONICS & TECHNOLOGY, INC., AN ITAR REGISTERED COMPANY

What is ITAR?

The International Traffic in Arms Regulations (ITAR) details the regulations governing the export of defense related materials and technologies, including hardware, software, and services. Governed by the Department of State, the ITAR's goal is to safeguard U.S. national security and further U.S. foreign policy objectives.

It provides definitions of important terms, with information and procedures for registration, licenses, agreements, general policies, violations, penalties, and administrative procedures.

If your company deals with military equipment, supplies, or technologies, ITAR regulations dictate that you share these items only with U.S. persons and organizations — Vector ***IS*** that company.

NORTH HOLLYWOOD, CA 91605

REGISTRANT CODE: M26764
EXPIRATION DATE: 05/31/2012

Reference: Manufacturer Registration Statement, Transmittal Letter and Fee Submission

Dear Mr. Bajaria:

The Office of Defense Trade Controls Compliance, Compliance and Registration Division (CRD), received your registration statement, transmittal letter and fee to register as a manufacturer. Our review is now completed. Your registration code is M26764. It expires on 05/31/2012.

Any person who engages in the United States in the business of either manufacturing or exporting defense articles or furnishing defense services is required to register and keep their registration current with this Office pursuant to the Arms Export Control Act (AECA) and the International Traffic in Arms Regulations (ITAR Part 122). Registration serves as a precondition to submitting an application for an export license or other approval from the Directorate of Defense Trade Controls (DDTC), or to use of export exemptions. This registration does not satisfy the requirements for registering as a broker pursuant to ITAR Part 129.

ITAR Section 122.5 requires you to maintain records concerning your registration and the manufacture, acquisition and disposition of defense articles; the provision of defense services; and information on political contributions, fees, or commissions furnished or obtained, as required by ITAR Part 130. Records maintained shall be available at all times for inspection and copying by this Office or by Customs officials. To maintain such records, managers, supervisors and employees need appropriate training on AECA and ITAR requirements and understand the individual and organizational ramifications for failure to comply. Ramifications may include shipment delay and/or shipment seizure by Customs and Border Protection, loss of export privileges, or criminal charges.
